## Alert Manager through Ozmosys Helps You Manage and Deliver Your Content Subscriptions

Imagine ONE e-mail consolidating numerous alerts and updates ... and an easy-to-use administration tool for managing hundreds of distribution lists.

Alert Manager aggregates titles and summaries from Premium/subscription content providers, publishers, RSS and Atom Feeds as well as Internal content.

Ozmosys acts as your technical intermediary and service bureau. You still control your subscriptions and licenses with the content providers.

Current awareness must fit your organization—its specific professionals and their very diverse information needs. Delivered through a variety of methods and delivery times, Current Awareness products provide critical information to individuals and/or the entire organization.

### What is Alert Manager?

Alert Manager brings all of your content sources and subscriptions together under one central administration tool. Manage how your organization monitors, organizes and profiles information for every professional efficiently and effectively. Increase awareness by consolidating content sources for every recipient in one email without overwhelming the reader.

- Gather news from thousands of sources automatically
- Manage Google News searches
- Easily find the content sources you need and deliver it.
- Route information and manage Subscriptions for groups and individuals
- Download Routing and Subscription reports based on group, department, office, recipient or content source
- Deliver via Email, RSS Feed or API
